Year	School	Studies
1998-2008	Santa Monica College, El Camino College and West LA College	Computer Science courses

LANGUAGES

Spanish	(native)
English	(fluent)

EXPERIENCE

May 2022 - Jun 2026 | ACPro.com | Fontana, CA | Remote

- Developed Laravel, Vue.js, and MySQL applications supporting billing, invoice payments, shopping cart payments, saved payment methods, and accounting workflows.
- Built and maintained customer-facing payment systems integrating with Authorize.net and later CardPointe.
- Supported credit card and ACH payment workflows, including customer-managed saved payment methods.
- Automated a complex accounting payment-processing workflow that previously required one person working on it throughout the day, significantly reducing manual labor and lowering the risk of errors.
- Created systems for generating and sending customer invoices on daily or monthly billing schedules.
- Improved an existing shopping cart payment flow by making payments more flexible and supporting additional payment methods.
- Built an internal product-selection tool to help users configure AC system components through guided menu selections.

Sep 2021 - May 2022 | Deliver-it.com | Anaheim, CA

- Maintained and updated existing Angular-based web applications, supporting application fixes and general maintenance.

Jun 2014 - Oct 2020 | PolicyMap.com | Los Angeles, CA

- Created custom client reports using JavaScript, jQuery, D3.js, and existing APIs.
- Built dynamically generated reports based on user-selected geographic areas.
- Contributed Vue.js components to the company's main interactive U.S. map tool, including menu, layer selector, and reports interface components.
- Built internal control panel tools to support business administration and internal team workflows.

Mar 2003 - Jun 2014 | Omnis.com | Torrance, CA

- Created a custom PHP and Oracle-based help desk system from the ground up for internal support operations.
- Added features including ticket tracking, trainee message approval workflows, statistics, and support tools.
- Redesigned customer contact management tools related to domain names, user accounts, and credit cards.
- Created an automated web application installer for hosting customers, similar to Installatron or Softaculous.

FREELANCE PROJECTS

2018 - 2021 | Graduacion.com.mx | Mexico. DF | Remote

- Developed Laravel-based business systems as a freelance side project for a graduation and event-services company.
- Built tools for banquet estimate generation, event social wall displays, payment administration, provider payments, event administration, and employee role/permission management.
